

Pathway for training in Point-of-Care Ultrasound PoCUS

Induction Phase

via Approved course or Modular programme

This is an important introduction to the applications (i.e. type of scan) and should include practical exposure

Knowledge – learn the principles of PoCUS, including physics and governance **Skills** – introduction to skills required

Behaviour - introduction to the application of PoCUS to patient care

Experiential Phase

via Simulation *or* Supervised practice *or* Non-contributory practice

Knowledge - consolidate knowledge learned in Induction Phase

Skills - develop skills through practice

Behaviour - learn how to apply PoCUS to clinical practice

Competency Phase

via Local Assessment or OSCE or Approved Finishing School

Knowledge – demonstrate knowledge learned in Induction Phase

Skills - demonstrate PoCUS

Behaviour - demonstrate how to apply PoCUS to clinical practice

Final Sign-off Phase for CORE level

via Regional CEM Ultrasound Lead or deputy

CEM Draft PoCUS Pathway v1 Dec 2013
